

Lyn's Eyes

$$1 = G$$

Don Henley and Glenn Frey

The image displays a 4x4 grid of 16 diagrams, each representing a different state or transformation of a 3x3x3 Rubik's cube. Each diagram is a 4x4 grid of cells, with some cells shaded blue and containing numbers. The diagrams are labeled with mathematical expressions: 1, $1^{\Delta 7}$, 4, 2^- , 2, 5^7 , and 1. The diagrams show different configurations of shaded cells and numbers, representing different states or transformations of the cube.
