

Tom Dooley

$$1 = C$$
[illegible]

The diagram illustrates a sequence of 15 blue rectangular blocks arranged in a staircase pattern across four vertical lines. The blocks are labeled with numbers: 5, 5, 5, 6, 1, 2, 2, 2, 2, 1, 6, 5, 6, 1, 5. A symbol ϕ is located above the third vertical line.

The diagram illustrates the construction of a staircase with 5 steps. It shows three stages of the process, separated by vertical lines. In the first stage, a single step is shown, labeled with the number 1. In the second stage, three steps are shown, labeled with the number 3. In the third stage, five steps are shown, labeled with the number 5⁷. The steps are represented by horizontal bars of increasing height, and the labels are placed below the first step of each stage.

The diagram illustrates the step-by-step construction of a Huffman tree. It shows how individual nodes (represented by blue boxes with numbers) are merged into a tree structure. The process starts with a single node '5' and a single node '6'. These are merged into a tree with root '11'. This process is repeated for the next set of nodes, eventually leading to a complete Huffman tree structure.

3. *D.S. al Coda*

A diagram consisting of a vertical line on the left. At the top of the line is a diamond symbol. A horizontal bar extends to the right from the line, labeled with the number '1'. Below this bar, the number '1' is written again.
