Figure 1 displays a sequence of diagrams illustrating the evolution of a quantum state, organized into a 6x4 grid. Each diagram shows a horizontal bar with segments labeled by integers (1, 2, 3, 4, 5, 6, 7) and superscripts (e.g.,  $6^-$ ,  $2^7$ ,  $5^7$ ).

The diagrams are arranged in a grid with rows and columns. The first four rows show a sequence of states, and the last two rows show a final state. The diagrams are labeled with "1." and "2." at the bottom right.
