Jerry Jordan

The diagram illustrates the decomposition of the tensor product of two 6-dimensional representations of $SU(3)$ into irreducible representations. The vertical lines represent the weight space, and the horizontal bars represent the irreducible representations. The top row shows the decomposition of the tensor product of two 6-dimensional representations into irreducible representations. The bottom row shows the decomposition of the tensor product of two 6-dimensional representations into irreducible representations. The middle row contains several bars with numbers 3, 4, 3, 2, 3, 3, 6, and 3.
